Quantum Mavericks

Final Project
Dating website: Effugio!

Functionalities:
User Login
- Display User Profile: List the logged in user's details with user's picture
- Create Profile: Allow new user to create a profile
- Delete Profile: User deletes his/her profile
- Update Profile: User updates his/her profile
- List connections: List connections of the user.
- List connection requests: List both the incoming and outgoing pending connection requests
- Accept/Reject connect request: User can accept/reject a pending connect request

Home Page:
- List profiles based on whether two people are interested in traveling to the same place
- Connect User: User can select a profile and send a connect request to the user.
- Send request for connection.

Additional features for the future:
- Block users: Don't allow user to view your profile in future. Profile inactive
- Link to Facebook while creating profile for new users.
- Report user: (Require admin login): Report users (flag users)
